Yahoo Intern User Experience Research Intern

Description

Yahoo, one of the world's leading technology companies, is offering a summer internship in User Experience Research in Maidstone. This is an exciting opportunity for individuals who are passionate about user experience and want to gain hands-on experience in a dynamic and fast-paced environment. In this blog post, we will provide an in-depth overview of the job description, responsibilities, qualifications, experience, skills, job benefits, and contacts for this exciting internship opportunity.

As a User Experience Research intern at Yahoo, you will be working with a team of experienced professionals in the user experience field. This internship is designed to provide hands-on experience in conducting user research studies to improve Yahoo's products and services. You will have the opportunity to work on real projects and contribute to the company's research initiatives.

Responsibilities

As a User Experience Research intern, you will be responsible for supporting the team in a variety of areas, including:

- Conducting user research studies, such as usability testing, surveys, and focus groups
- Analyzing and interpreting data to identify user needs, behaviors, and preferences
- Preparing research reports and presentations for stakeholders
- Collaborating with cross-functional teams to integrate research insights into product design and development
- Maintaining accurate records and documentation of research studies

Qualifications

To be eligible for this internship, you must meet the following qualifications:

- Currently enrolled in a Bachelor's or Master's degree program in Human-Computer Interaction, Psychology, or a related field
- Strong academic record with a GPA of 3.0 or above
- Strong interest in user experience research and design
- Excellent analytical, problem-solving, and critical thinking skills
- Strong communication and interpersonal skills
- Proficiency in Microsoft Office Suite, especially Excel and PowerPoint

Experience

While prior experience in user experience research is not required, any experience in conducting user research studies, analyzing data, or presenting research findings would be advantageous. Additionally, any experience working in a team-based environment or collaborating with cross-functional teams would be beneficial.

Skills

In addition to the qualifications and experience mentioned above, the following skills would be considered an asset for this role:

Hiring organization
Yahoo
